Election/Restrictions

1. This application, with the exception of claim 41, is primarily concerned with the alternative bristle arrangements of figs 20 and 21. It is noted that these alternative bristle arrangements are said to be applicable to any of the other embodiments (which dealt more with the drive mechanism). As such, an election of (1) one of the embodiments pertaining to the particular drive mechanism/brush movement; and (2) one of the alternative bristle arrangements (figs 20 and 21) is required.
2. This application contains claims directed to the following patentably distinct species of the claimed invention: (1) figs 9,9A; (2) fig 10; (3) fig 11; (4) fig 12; (5) figs 13-14; (6) fig 15; (7) fig 16; (8) figs 17-18; (9) fig 19; and (10) fig 22 and the sub-species (i) fig 20 and (ii) fig 21. NOTE: Applicant is required to elect **one of the primary embodiments** (identified as #1 thru #10) and **one of the sub-species** (either fig 20 or fig 21).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic to **all** of the embodiments.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
